

## **Job Posting**

### **3rd Shift-QA Technician**

#### Position Description:

Responsible for inspecting, testing and measuring sample parts for conformance to specifications such as dimensions, tolerances, hardness and other standards set forth in the control plan.

#### Position Requirements:

Candidates must have strong communication skills (both verbal and written), mathematical skills, and a High School Diploma or GED. Candidates must be familiar with visual inspection, concepts of measuring, use of various dimensioning equipment, and have basic computer skills. Proficiency with statistical methods (SPC), PPAP, and blueprint reading highly preferred.

Opening is on 3rd shift from 10 pm – 6 am and requires the ability to work overtime at the beginning or end of the shift and/or weekends. Training is scheduled to be 2 weeks on 1st and 2 weeks on 3rd shift. The QA technician position will report to Quality Manager.
